HOUSEHOLD HINTS

Always dry umbrellas OPEN and never keep them tightly rolled up, as this helps to dry them out from the inside.

When through constant wear, the edges of rugs or carpets turn over and curl, boiling water should be poured on the curled edge which can then be patted down flat to the floor. This treatment is said to lengthen the service of the material also.

For yellow stains from spoons, first rub them with a little salt, then wash them in soap and water and dry with a soft cloth.

One of the best fertilizers for a lawn is a mixture composed of three parts of cow manure, one part of phosphate of ammonia. Apply 1 to 25 pounds to 1,000 square feet in the early fall and again in the spring after the danger of frost has passed and the grass is making good growth.

below par before I started taking Sargon. Everything I ate disagreed with me. My stomach was so irritable and was continually troubled with biliousness, my kidneys kept me getting up all through the night, breaking into cold sleep and making me nervous and out of sorts. I've not only gained in strength and energy since I started Sargon, but I've gained eight pounds in weight besides. I have the appetite, never have a trace of indigestion, my kidneys seem normal, I sleep good and get up mornings all the strength and energy any man needs.

Completely submerged in water, a General Electric Refrigerating Unit operates with quiet, smooth, unflinching efficiency.

Here is the only unit hermetically sealed in steel—oiled once and for all at the factory. Efficiency is sealed in—trouble sealed

years without a thought. General Electric Refrigerators are modern in principle, fast in freezing performance, greatest in food storage capacity and by far lowest in cost per year.
